Experience

Web Developer and UX Consultant – Ed Cupaioli LLC

May 2021 - Present

- Designed and developed a Jekyll website for a recreation sports league that improved the experience for league admins, on-field referees, and players.
- Created goal tracking solutions for a Wordpress website with Google Tag Manager.
- Maintained and optimized a Shopify website along with establishing a product management process for bugs, features, and new pages.

Director of Experience – eStreet

July 2020 - May 2021

- Led the web development and UX department for a marketing and political consulting agency.
- Established and implemented a user-first web development process from discovery to launch resulting in significantly faster time to launch.
- Developed Jekyll and Wordpress sites and integrated e-commerce and CRM solutions that were tracked with an all-in-one Google Tag Manager solution.

Web Developer – Arcadia

February 2018 - July 2020

- Established an experiment pipeline and report template that efficiently managed simultaneous tests on multiple-platforms and reported findings to stakeholders.
- Performed qualitative and quantitative research on landing pages with Google Optimize, Google Analytics, and User Interviews that resulted in significant increases to conversions each quarter.
- Developed a conversion tracking solution with Google Tag Manager that allowed pixels to be easily added without touching the code of the website or dashboard.
- Managed the CMS and developed features for the enterprise Jekyll website and blog along with the Zendesk support center.

Frontend Developer – Democratic National Committee

December 2015 - February 2018

- Managed users and developed features and pages for an enterprise Expression Engine website.
- Developed rapid response websites with Jekyll and developed frontend tools for political participation and party operations.
- Optimized websites and tools for load speed, conversion rates, accessibility, and legacy browsers.

Web Developer – Self-Employed

December 2014 – December 2015

- Improved the CMS and reconfigured pages for the DCPCSB website for simpler document management and access. Integrated Highcharts into existing, editable content.
- Created an elementary science curriculum to use in conjunction with i-Tree software and designed and developed the website for the project.
- Designed and developed Wordpress and Drupal websites that allowed clients to manage all their content.

Web Communications Specialist – [OSSE DC](#)

March 2013 – November 2014

– Led and implemented the reorganization of an enterprise Drupal site, which resulted in decreased bounce rates and increased organic search traffic.
– Developed and trained staff on no-cost, easy-to-use solutions for public facing programs needing event management, assessments/surveys, public commenting, and mapping.
– Managed and created content for agency social media properties and developed the weekly newsletter.
